

Opportunities in TelcoTV: Forecast & Market Shares - 2006 to 2012

TelcoTV is a global phenomenon today. This report measures the impact of this market with global and regional subscriber forecasts for the top 50 TelcoTV service providers plus revenue forecasts for the top 50 TelcoTV system suppliers.

The report identifies the opportunities for TelcoTV system suppliers by identifying markets that are still open and by identifying which service providers are moving into their commercial phase and are likely to be reconsidering their choices of vendors.

The report ranks companies based on their forecasts in five TelcoTV system categories: - access systems, video on demand systems, middleware systems, content security systems, and set-top boxes as well as globally and by region.

These ranks show, which are the leading companies in each of these TelcoTV system categories over the forecast period. This information shows who is ahead today and how that is likely to change as the market matures.

You can use these ranks to identify your company's position in the market today and likely position in the future. You can also use it to identify investment opportunities or to evaluate the strength of potential suppliers.

The report provides these forecasts and rankings on a regional basis including Europe, Asia, North America, and the Rest Of the World (ROW). These rankings are also broken down into the five product segments listed above.

An Excel spreadsheet accompanies the report that includes 24 supplemental charts in addition to the backup data for the 16 forecast charts in the report. The Annex also includes 34 supplemental tables in addition to the 39 tables included in the report. This Annex provides information that you can use to perform an individualized analysis that reflects your company's particular situation. The 50+ service providers with individual forecasts in this report include those service providers which account for nearly 90 percent of the subscribers forecasted for 2012.
