

Global Opportunities in Wireline Broadband Networks: Analysis & Forecast:2007-2013

Analysis and forecasts for both the developed and emerging markets for wireline broadband networks.

Broadband services are approaching saturation in the developed countries of Europe, Asia, and North America. In these developed countries the opportunities are now being driven by new services such as IPTV very high speed data services. On the other hand, there is significant subscriber growth occurring in emerging countries. China and India will be the most important wireline broadband markets in the next few years. There will also be significant opportunities in smaller emerging countries.
